

Institute for Complex Systems in Rome, Italy, is seeking a *post-doc* as part of the Granular Matter research program, which includes spontaneous symmetry breaking in granular ratchets and statistical properties of sheared granular matter.

The position is for a one-year, renewable for a second year. Candidates should have a good background in non-equilibrium statistical physics or mechanics of materials, and of computer programming. They will also be required to interface standard laboratory instruments with computers and perform statistical analyses.

All enquiries should be directed to:
